Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 28-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Welsch (6145289), in view of Stephenson (4590751).

Welsch discloses:

First & second & third passes having the same direction, in the second & third passes the conveyor is lowered, and in the first pass it is raised (fig 3).

Welsch does not disclose that the second harvesting pass can be done in the opposite direction.

Stephenson discloses an alternate operating mode in fig 11, that the second pass can be in the opposite direction.

Art Unit: 3671

It would have been obvious to one having ordinary skill in the art at the time the invention was made to know that harvesting with the device of Welsch can be done in "one" & "opposite" directions as demonstrated by Stephenson, in order to be able to cut grass without driving on uncut grass and to have less adjustments to the conveyor, i.e. leaving the conveyor in position shown in fig 3 at pass II for pass III.

Response to Arguments

3. Applicant's arguments with respect to claims 28-34 have been considered but are moot in view of the new ground(s) of rejection.
